

Pillows, the *Vefer*[®] soul s.p.a.

The neck area is a very delicate part of the body that is subjected to continuous stress; for this reason the function of the pillow is crucial.

In order to ensure a good rest and prevent pain and tension, Vefer has devised pillows that support the head and neck, giving proper rest in the central part, taking weight off the head and neck vertebrae so as not to be compressed but remain stretched and relaxed.

Vefer offers different types with different materials and degrees of softness; its products guarantee ergonomic, stable and uniform support.

The soft pillows with a light and elastic support absorb body heat, giving you a pleasant feeling of freshness.

For correct posture of the head and spine during sleep, it is very important to choose a pillow that suits your shape and the way you sleep in order to provide maximum comfort and total rest. Vefer pillows are ergonomic, hypo-allergenic, anti-mite and breathable because they are made from the finest materials and with high technical features in harmony with nature.

The particular processing favours transpiration and ventilation in order to allow natural air circulation leading to stress release and relaxation.

Vefer allows you to choose between self-modelling and morpho-dynamic pillows for improving individual rest.

KLIPER, MIX AND POOL COLLECTIONS

This new range of “multi-firmness” pillows employs unique technology to combine various materials in a single pillow. No glues. No additives.

At Vefer our top quality and high performance materials open new frontiers in our quest for ever greater comfort and personalization, in line with customers’ increasingly sophisticated requirements, especially for pillows.

polarGelfoam

polarGelfoam® KLIPER orthocervicale
polarGelfoam® AIRY KLIPER orthocervicale

Dalla ricerca Vefer, sui sistemi colloidali, è nato **polarGelfoam®**, una straordinaria schiuma poliuretanica atossica, priva di sostanze volatili e plastificanti, che favorisce una piacevole sensazione di freschezza.

Fruto de la investigación de nuevos productos efecto gel, Vefer ha creado **polarGelfoam®**, una extraordinaria espuma de poliuretano no tóxica y libre de sustancias volátiles y plastificantes, que proporciona una placentera sensación de frescor.

De la recherche Vefer, sur les systèmes colloïdaux, est né **polarGelfoam®**, une mousse de polyuréthane unique, non toxique, dépourvue de substances volatils et de plastifiants, qui favorise une sensation agréable de fraîcheur.

At Vefer, our research on colloidal systems has generated **polarGelfoam®**. The absence of volatile or plasticized substances in this extraordinary, non-toxic polyurethane foam makes for a pleasantly fresh feel.

Aus Vefers Forschung über kolloidale Systeme wurde **polarGelfoam®** entwickelt, ein hervorragender, nicht toxischer Polyurethanschaum ohne flüchtige und plastifizierende Substanzen, der eine angenehme Sensation von Frische hervorruft.

tecnomind® AIRY POOL BUGNATO saponetta grande

Tecnomind®: l'eccellenza. Schiuma viscoelastica ad altissima densità. La sensazione di consistenza e compattezza che trasmette lo caratterizza garantendo risultati ineguagliabili, ottenendo le massime performances per applicazioni piu' sofisticate e tecnologicamente piu' avanzate. Durata illimitata.

Tecnomind®: die Vollkommenheit. Viskoelastischer Schaum mit sehr hohem Raumgewicht. Es wird ein Gefühl von Fülle, Konsistenz und Kompaktheit vermittelt, um einzigartige Ergebnisse zu garantieren, die es erlauben Spitzenleistungen für hochentwickelte und technologisch fortschrittliche Anwendungsbereiche zu erzielen. Unbegrenzte Haltbarkeit.

Tecnomind® stands for excellence. This extremely high density viscoelastic foam is full and compact for unsurpassable and life-long feel and performance in the most technologically advanced applications.

Tecnomind®: L'exellence. Mousse visco-élastique de haute densité. La sensation de consistance et compacité qu'il transmet le caractérise en garantissant des résultats inégalables, il obtient les meilleurs performances pour des applications très sophistiquées et technologiquement plus avancées. Durée illimitée.

Tecnomind®: La excelencia. Espuma viscoelástica de altísima densidad. Caracterizado por la sensación de consistencia y de compactación que transmite, garantizando resultados inigualables, obteniendo el máximo rendimiento en las aplicaciones mas sofisticadas y tecnológicamente más avanzada. Duración ilimitada.

guanciali

Nel campo dei poliuretani Vefer ha sempre utilizzato materiali purissimi e di prima qualità, senza sofisticazioni che ne pregiudichino le caratteristiche fisico-meccaniche. Tutta la gamma dei prodotti Vefer ruota attorno alle capacità di esprimere le qualità di impiego del poliuretano. La gamma di prodotti, diversi per densità, portanza, indeformabilità, elasticità ne ha fatto nel tempo un materiale insostituibile nel campo del dormire e della ricerca del confort in generale.

*Vefer has always used clean, first rate materials in its polyurethane foam manufacturing, respecting the physical-mechanical qualities of the foam.
The complete Vefer range demonstrates the usefulness of polyurethane.
The range of products, densities, support, shape retention and elasticity makes polyurethane foam an irreplaceable component in sleeping and general comfort products.*

*Vefer verwendet für den Polyurethansektor stets reinste, erstklassige Materialien ohne Verfälschungen, die die physikalisch-mechanischen Eigenschaften beeinträchtigen.
Die gesamte Produktlinie von Vefer dreht sich um die Fähigkeit der Qualität für die Anwendung des Polyurethanschaums Ausdruck zu verleihen.
Die nahezu unendliche Palette an Produkten mit unterschiedlichem Raumgewicht, Stauchhärte, Unverformbarkeit und Elastizität hat im Laufe der Zeit ein unersetzliches Material im Schlafsektor und für die Forschung nach Komfort im allgemeinen, geschaffen.*

*En el campo del poliuretano, VEFER siempre ha utilizado materiales purísimos y de primera calidad, sin sofisticaciones que perjudiquen las características físico mecánicas de las mismas.
Toda la gama de productos VEFER se basa en su capacidad de sacar la mejor calidad de las poliuretanos empleados.
La gama de productos, diferentes por densidad, dureza indeformabilidad y elasticidad han hecho que a lo largo del tiempo haya sido un material insustituible en el campo del descanso y de la búsqueda del confort en general.*

*Vefer a toujours, dans le champ des polyuréthanes, utilisé des matériels purs et de première qualité, sans falsifications pour ne pas compromettre les caractéristiques physico-mécaniques.
Toute la gamme des produits Vefer tourne autour des capacités d'exprimer les qualités d'emploi du polyuréthane.
La gamme de produits, différente densité, portance, indéformabilité, élasticité.
Il en a fait dans le temps un matériel irremplaçable dans le champ du dormir et de la recherche du confort en général.*
